SKILLS

- Windows administration
- Networking
- Wireshark
- Shell
- Server administration and deployment
- NAT technologies
- Subnetting and packet flow
- SD-WAN routing
- Load balancing
- IDS/IPS implementation
- VPN technologies (IPsec, SSL, L2TP, PPTP)
- TCP/IP
- Sophos
- Fortinet
- Check Point
- Cisco
- Web application firewall
- TLS/SSL encryption
- Endpoint security
- Seqrite / Quick Heal
- Bitdefender
- OSI model
- Cryptography
- Network security
- Wireless access points
- Microsoft Office and Microsoft 365
- Windows Server implementation
- IT asset management
- Customer and end-user support

PROFESSIONAL SUMMARY

IT Support and Network Security professional with 5+ years of experience across UAE, Saudi Arabia and India, specializing in firewall administration (Sophos, Fortinet, Cisco), Microsoft 365, network infrastructure and security hardening. Proven record in IT asset governance, storage and server issue resolution, and multi-brand IT operations. Pursuing a Network Security Engineer / Ethical Hacking specialization.

EXPERIENCE

May 2026 - Present

Support Engineer

Office Connect Group | Dubai, UAE

Support IT infrastructure and network security across a multi-brand organization.

- Administer Sophos, Fortinet and Cisco firewall infrastructure, access controls and network security policies.
- Manage Microsoft 365 services, including Outlook, OneDrive and SharePoint Online, service accounts and user permissions.
- Investigated SharePoint Online storage consumption, identified the largest storage-consuming site and recommended a per-site audit.
- Planned a Windows Server 2012 file server migration to Ubuntu Server 24.04 LTS and Samba for file sharing and scan-to-folder workflows, including security hardening.
- Maintain an IT asset register with standardised asset tags, device serial numbers and model information.
- Support network connectivity, conference room AV, ESET endpoint security, mobile devices and WordPress.
- Coordinate employee offboarding, equipment handovers and access revocation.

July 2025 - April 2026

Network Specialist (Low Current)

Safari Group | Al Qassim, Saudi Arabia

King Abdulaziz Specialized Hospital (KASH)

- Maintained hospital network and low-current systems, including access control, IP surveillance, IPTV, public address, master clock, AV and nurse call systems.
- Diagnosed LAN connectivity faults and restored network access for end-user devices across hospital departments.
- Administered door access control systems and supported IP camera visibility, time synchronization and IPTV connectivity.
- Planned, terminated and activated network data points; supported conference room microphones, projectors, displays and video conferencing equipment.

CERTIFICATIONS

- Cisco Certified Network Associate (CCNA)
- Fortinet NSE 1, 2 and 3
- Fortinet Threat Landscape
- ET80 - Sophos Firewall v19.5 - Engineer

ADDITIONAL SKILLS

Endpoint security

- ESET; Seqrite/Quick Heal; Bitdefender

Low-current systems

- Access control; IP surveillance; IPTV; public address; master clock; AV; nurse call

English

Hindi

INTERESTS

Singing, travelling and movies

EXPERIENCE

October 2022 - June 2025

Support Engineer (Security)

Specsia Technologies | Mumbai, India

Provided global technical support for Sophos and Fortinet firewalls, including Priority 1 and 2 network-down incidents.

- Troubleshoot firewall and security appliance faults, network congestion, memory utilization and packet-flow issues.
- Resolved site-to-site and remote access VPN problems, including connectivity and authentication issues.
- Diagnosed multi-factor authentication (MFA), web authentication, web filtering and application filtering issues.
- Used packet captures and debug logs to investigate network and security appliance behavior.
- Supported firmware upgrades, crash recovery and password recovery; provided guidance on known vulnerabilities.
- Explained appliance and protocol behaviour to customers and coordinated troubleshooting with network engineers through calls and email.

January 2020 - August 2022

Network Engineer

Eastern Services | Mumbai, India

- Monitored network performance and service metrics, prepared monthly reports and analyses network capacity.
- Diagnosed connectivity and infrastructure faults and carried out maintenance during non-peak hours.
- Configured access control lists (ACLs) for traffic filtering and maintained firewall policies.
- Documented network and telephony configurations, equipment versions and hardware inventory.
- Coordinated with colleagues, contractors and site supervisors to resolve issues and support project requirements.
